

# International Union of Painters and Allied Trades

**L**ocal Union 739 of the International Union of Painters and Allied Trades is well known as a leader in the crafts we have represented for over 100 years in Manitoba and Saskatchewan.

We want the construction industry in Saskatchewan to continue to thrive and grow. Key to that continued success and growth is a stable, dependable supply of skilled tradespeople. We have demonstrated our ability to provide such tradespeople to the painting, glazing, floor covering, and hazardous material removal sectors.

Identifying, training and dispatching workers is only part of the process; we have to ensure we can retain skilled workers as well, and research has shown over and over that a solid health and welfare package, along with a stable, dependable pension plan, are key for workers making long term career decisions.

Our objective is to help our contractors and our members prosper by providing the most productive, cost-effective and quality minded workforce available anywhere. This objective is our commitment as a business

organization serving a constructive role for this industry and your business.

Local Union 739 provides trained multi-craft professionals to commercial, industrial, and residential building contractors. Local 739 has access to a labour pool from across North America to ensure the ongoing availability of trained, qualified workers.

We are a proactive business partner with a modern view of meeting your operational and economic needs. We prove it in the field to our contractors every day.

## What Next?

We would like to have an opportunity to present the benefits of our services. There is no obligation on your part.

To arrange a brief meeting to explain how your company can benefit and, even more importantly, for you to see that we mean business.
